DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Yoon S. Ham on 9/16/2009.

Claim 9 is amended to adjust the dependency to claim 1 as follows:

9. The system as claimed in claim ~~6~~ 1, wherein the forward link includes a pilot channel used for transmitting a pilot signal allowing the 1xEV-DO system to track the hybrid access terminal, a MAC (medium access control) channel used for controlling the reverse link, a control channel used for transmitting a broadcast message or a direct message for directly controlling a specific hybrid access terminal from the 1xEV-DO system to the hybrid access terminal, and a traffic channel used for transmitting only packet data from the 1xEV-DO system to the hybrid access terminal.

Claim 17 is amended to adjust the dependency to claim 11 as follows:

17. The method as claimed in claim ~~45~~ 11, wherein the predetermined return start time is set as 3.36 seconds or 4.48 seconds.

Allowable Subject Matter

2. Claims 1-5, 8-14, and 17-25 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach a method and system for preventing call drop from occurring between a CDMA 1xEV-DO system and a hybrid access terminal as substantially described in the amended independent claims 1 and 11. System claim 1 contains limitations stating wherein a hard handoff is carried out in the case of forward link by transmitting data with maximum power without performing power control, and a soft handoff is carried out in the case of the reverse link while performing the power control. Method claim 11 recites limitations stating the predetermined start time is shorter than a call drop time required for the call drop and the predetermined start time is set as an integer times of slot cycle index. These limitations, in combination with the remaining limitations of claims 1 and 11, are not taught nor suggested by the prior art of record whether alone or in combination. Claims 2-5, 8-10, 12-14, and 17-25 depend from claims 1 and 11 and are therefore allowed for the same reasons

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL T. THIER whose telephone number is (571)272-2832. The examiner can normally be reached on Monday thru Friday 7:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Edouard can be reached on (571) 272-7603. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
